About This Game

Quench is a story-driven puzzle game set in a colourful, lo-fi world. Become Shepherd, an avatar of nature, and guide herds of animals on their difficult journey. Help Shaman, the young Elephant leader, convince the other animal tribes to join her. Protect the herds as they are beset by flood, fire, drought, and the dark smokebeasts that have spread across the land.

Gameplay

Godlike nature powers.

Players take control of the environment around the animals: they can grow grass and trees, start forest fires, shift sand dunes, or create new rivers and lakes —
the world is theirs!

Thoughtful environmental puzzles.

There are many ways to tackle encounters with dangerous creatures and environments, but players who guide their animals to safety with care and kindness are always rewarded.

Story-based levels.

Every level tasks players to use their power wisely to overcome unique challenges presented by changing environments, new animals and perilous smokebeasts encountered on the journey.

Features

Embrace your power!

Players begin by shepherding a single herd of elephants with gentle environmental challenges, and ramp up to managing multiple animal herds and navigating treacherous areas packed with smokebeasts.

Colourful, lo-fi world!

The use of triangular mosaics, vibrant colours taken from nature, and a papercraft-inspired world gives Quench its distinctly geometric aesthetic.

Heartfelt story!

Through gorgeous illustrated cinematics and in-game dialogue, players explore how kindness, compassion, and forgiveness are powers unto themselves in this fable about overcoming differences to restore the world – a perfect story for parents and kids to share!

2.03 Door

2.03 DOOR

Here a crude sliding door blocks the tunnel leading into the mine. The door is painted in a vitreous, deep blue color and has a peephole for looking outside. Fitted in a wooden frame, it is held closed by simple loop of rope, easily cut from the outside with a blade. Built for kobolds, the flimsy door is just 5 feet tall and can be shattered with a DC 15 Strength check.

COMBAT (100 XP)

A kobold warrior always keeps watch behind the door.

Combat - Door Guard

KOBOLD TALKING

Although kobolds speak Common and can understand the PCs, they are not keen on communicating with hostile humans. Unless the PCs capture a live kobold, any attempt to talk with the critters is met with hisses and squeaky curses in Draconic. Similarly, interrogating captured kobolds yields little useful information. If interrogated, they can reveal any of the following information:

The kobolds believe they have already found the silver at the feet of the "great demon" that lives on the Peak of the Vernal Dawn. They don't know anything about the Sturgrimate, whom they call "the devil lion", though the beast has already killed two of them. Karzuss sent a few scouts to explore the higher reaches of the Cobalt Chasm, though they have yet to return.
